AUTHOR INDEX

Notes:
(1) Several (71) papers cited at the end of the article by K. A. Shore and M. W. McCall, pp. 63–129, are not referred to in the text. These papers have not been included in the index.
(2) Reference 668 in the article by Imasaka and Ishibashi, pp. 131–249, mentions I. Nino as co-author. This should have been I. Hino, and it is indexed under this name.
(3) References 100 and 132 of the article by Göbel and Ploog, pp. 289–356, are not referred to in the text and are therefore not indexed. Reference 107 has been omitted from text and reference list and is not indexed. References 104–112 are not indexed as they do not occur in the reference list.
(4) Conference proceedings which do not select an individual paper and refer to a catalogue have not been indexed (Refs 1, 40, 47, p. 238/9, Refs 36 and 39, p. 252).

Trace analysis 149, 150, 153, 154, 159, 161, 162, 164, 171, 172, 178, 182, 194, 195, 199, 202, 204, 206, 207, 210, 211, 229, 231, 235
Transistor fabrication 312
Transmission electron microscopy "TEM" 313, 339
Travelling wave amplifier "TWA" 98
Tunneling 348–350
Turbidimetry 151
Two-photon absorption measurements 205, 209
sequentially-excited fluorescence "SEF" 205
two photon-excited fluorescence "TPEF" 205, 216

Video transmission, analogue 74

Wavelength multiplexing
cross talk 98–99
intermodulation products 98

Xenon-ARC lamp 219
X-ray absorption fine-structure technique, extended "EXAFS" 270
X-ray diffractometers, high resolution 313, 316
high angle scattering 313
small angle scattering 313
X-ray laser
UV radiation laser "XUV" 276
collisionally excited laser 278–279
cylindrical cavity 277
exploding foil target 277, 279
fibre target 277, 279
microtubes 277
Ne-like Se laser 278
Ni-like ytterbium laser 279
photoexcitation pumped laser 280
photoionization pumped laser 280
planar target 280
recombination lasers 279
"water window" 276
X-ray refraction 280
X-ray lithography 270, 273
X-ray microscopy, contact 270, 276
X-ray radiation
cylindrical shaped plasma 254
laser driver parameters 273, 274
pulse length 274, 275
laser plasma sources 269
heated cavity 270
planar targets 271, 280
side cavities 271
prepulse driver pulse 275
soft X-ray 251, 261
pinhole camera 261
X-ray shadowgraphy 270

Zeeman atomic absorption spectrometer 190
Zeeman background correction technique 191
